The ancient Nalanda university was the epicentre of knowledge. It had played a very important role in spreading the knowledge around the world. I am from Bihar so from my childhood, I heard many stories regarding its fame and glory. To revive its glory Nalanda International University was established. Till its inception I want to be its part. This university fascinated me a lot. I know this university will soon become the epitome of knowledge.

This university also provide the foreign students to interact with each other and share their ideas, culture, tradition, values, skills etc. If I get admission in this university then I feel very proud, its my honour to be its part. I will try my best to maintain its dignity and fame.
